

THE BEAUTY OF NEW ENGLAND FOR THE FLOORS OF AMERICA

Nano Tech Finish

Our 7 Step Finish

- Layer 1** 15-18 grams per square meter tie coat applied for the foundation
- Layer 2** Full pore fill of 18-25 grams per square meter
- Layer 3** 15-18 grams per square meter urethane material applied
- Layer 4** Wet-on-wet two coat application totaling 20-25 grams of urethane per square meter
- Layer 5** 20 grams per square meter layer of urethane applied
- Layer 6** First application of **Nano-Tech** applied
- Layer 7** Second and final coat of **Nano-Tech** and Ultra –fresh coating material applied

Green River introduces **Nano-Tech** for all *Cape Cod Collection* and *American Heritage Collection*

With **Nano-Tech** the proprietary particles in the finish are molecular in size. This creates a layer of finish that forms a solid film, thus creating an extremely scratch resistant surface. A good test of the finish is to take the coarsest steel wool and bear down hard to try to scratch the finish.

In the market place today, Nano-Tech provides two important features the consumer is seeking in pre-finished hardwood flooring – Improved scratch resistance and a comprehensive wear through warranty.

The Green River Nano-Tech finish also includes an anti-microbial ingredient called Ultra-Fresh, that is both anti-bacterial and anti-fungal. This has no effect on the performance of the coating. It is effective for the life of the finish and will not be removed by routine maintenance.

Benefits of the Nano-Tech Finish

1. Next generation, state-of-the-art, in pre-finished flooring
2. Superior scratch resistant surface
3. Addition of Ultra-fresh (An anti-bacterial / anti-fungal ingredient)
4. Limited lifetime wear warranty for residential application
5. Limited five year wear warranty for most commercial applications suitable for solid hardwood flooring
